Project readiness - 2pt.

We clone the **dev** branch, because there is nothing to run in **main**. Because there is no description of baseline reproduction, we try to run junk_experiment.ipynb
It was not running successfully because of absence the folder creation function:
from src.utils.os_utils import create_folder there was no *os_utils* in *src.utils*
I suppose the project is quite far from complete, because out of 6 models declared in the baseline, I found the code for only one (perhaps, this is because of a lack of documentation).

A code review part - 4pt

Code is quite well, but in file
https://github.com/adasegroup/cohortney/blob/dev/src/networks/lstm_pp.py
I suppose to make function *LSTMMultiplePointProcesses* derivative from *LSTMSinglePointProcess,* so definition of function should be:

https://github.com/adasegroup/cohortney/pull/7/commits/86fcd9c0bd69b363514bbf5073160b49ae7d4a52
